

Sistelbanda will showcase innovative LTE Small Cell ecosystem at MWC2016

Valencia, Spain - December 2nd, 2015 - Sistelbanda is proud to announce its presence as exhibitor at Mobile World Congress 2016 in Barcelona from 22nd to 25th of February 2016.

Specifically, Sistelbanda will be highlighting its complete LTE Small Cell ecosystem, including the efficient SN4G Small Cell Protocol Stack, compatible with the leading LTE chipset platforms available in the market, SN4G small cell manager including Home eNodeB Management System (HeMS), responsible for O&M, configuration and provisioning of HeNBs and SN4G SON system, to manage new base stations to become essentially "Plug and Play" items, optimizing the operational characteristics to best meet the needs of the overall network and incorporating self-healing functionalities.

At the same time Sistelbanda is providing specific Hardware design for LTE small cells, bringing to the market the most innovative complete solution for pure LTE 4G Small Cells scenarios, including the market leader chipset provider for LTE small cells.

Sistelbanda is also focused on customization aspects, bringing to operators worldwide personalized solutions to cover the specific needs. Sistelbanda also integrated the ecosystem to other providers, making compatible to existing deployments, and adding just the parts missing to get a complete fully operational LTE Small Cell network.

Sistelbanda will receive all attendees at Mobile World Congress on its booth placed at Congress Square, Spanish Pavilion. Please do not hesitate to contact Sistelbanda team to arrange a meeting or a demo during the event to explore ways of collaboration.

About Sistelbanda S.A.

Sistelbanda S.A. is the company that provides all the key software elements that work seamlessly together to build a complete and fully customizable small cell solution, thus enabling the differentiation of telecom equipment vendors and network operators.

We provide LTE Small Cell software solutions, software customization and hardware design services, ensuring that all the elements fit together, reducing time-to-market for our customers. Sistelbanda S.A. is an ICT manufacturer company of high added-value products for advanced wireless communications.
